

Cell Freezing Medium-DMSO [w/ high concentrated FBS]

This Cell Freezing Media is a ready to use, a convenient alternative to in-house freezing media and can be used for a wide variety of mammalian cells. The reagent is designed to protect and preserve cells during frozen storage.

The formulation is prepared in Dulbecco's Modified Eagle Medium, contains 10% DMSO and higher concentration of fetal bovine serum. DMSO acts as a cryoprotectant and prevents formation of ice crystals and prevents cell damage. It is ready to use and does not require further addition of any other reagents. The medium does not contain antibiotics.

This cryopreservation medium can be used for sensitive cell lines that are very susceptible to freezing damage.

Catalog No.	523163
Size	50mL
Product Category	Cell Freezing Media
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
