

Soil Beta-Glucosidase Activity Assay kit

S-B-GC can catalyze the hydrolysis of the glycosidic bond between the aryl group or the hydrocarbon group and the sugar group to generate glucose. It is one of the important components in the cellulolytic enzyme system and is important in the carbohydrate metabolism of soil microorganisms.

S-B-GC can catalyze the formation of p-nitrophenyl-beta-D glucopyranoside to p-nitrophenol, which has characteristic light absorption at 400nm.

Catalog No.	251016
Size	50 Assays / 100 Assays
Product Category	Colorimetric Assay
Detection Method	Spectrophotometry / Micro-Plate Reader
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
