

Mayer's Hematoxylin staining solution

Mayer's Hematoxylin solution is used for counterstaining of tissue sections in immunohistochemistry, and the nucleus is blue after staining. This product is a working fluid and can be used directly. The dyeing solution can be reused many times, but the dyeing effect will gradually decrease.

Catalog No.	261015
Size	125mL
Product Category	Histochemical Stain
Storage/Stability	Ambient/1 year
Shipping	Ambient
