

Bacterial Protein Extraction Kit

Bacterial protein extraction kit is used for extracting soluble protein from E. coli. The lysate in the kit contains protease inhibitors, which has a strong effect and can quickly obtain bacterial protein. The kit is ideal for the Western blot experiments and other basic researches and it is not recommended for the protein kinase and phosphokinase.

Kit Components:

1. Lysis Solution: 50mL
2. Protease Inhibitor [100x]: 0.5mL
3. PMSF [100x]: 0.5mL

Catalog No.	501013
Size	50 preps
Product Category	Protein Isolation
Storage/Stability	2 ~ 8°C & -20°C/1 year
Shipping	Gel Packs
