

Phosphorylated Protein Extraction Kit

Phosphorylated Protein Extraction kit provides a simple and convenient method of extracting the Phospho proteins from the cells or fresh tissue. The lysate in the kit contains protease inhibitors and phosphatase inhibitors, which has a strong effect and can quickly obtain total protein. It can be used for western blotting experiments, etc. It cannot be used to study protein kinases and phosphokinases.

Kit Components:

1. Lysis Solution: 50mL
2. Phosphatase Inhibitor [100x]: 0.5mL
3. Protease Inhibitor [100x]: 0.5mL
4. PMSF [100x]: 0.5mL

Catalog No.	501016
Size	50 preps
Product Category	Protein Isolation
Storage/Stability	2 ~ 8°C & -20°C/1 year
Shipping	Gel Packs
