

## Animal Cell/Tissue Total Protein Extraction Kit

---

Animal Cell/Tissue Total Protein Extraction kit is a new generation of ultra-fast protein extraction tools. There is growing evidence that the most commonly used RIPA buffers can cause random loss of protein, producing a lot of difficult data that is difficult to interpret. This kit uses a spin column extraction technique combined with an optimized lysis buffer for faster and more efficient extraction of total protein, resulting in more accurate WB results. Using a centrifuge column to extract protein, the minimum extraction system can be as low as 20µL, which can effectively solve samples with small sample volume.

Catalog No.	501103
Size	50 preps
Product Category	Protein Isolation
Storage/Stability	Ambient / 1year
Shipping	Ambient
