

Acridine Orange (AO) solution [1mg/ml]

Acridine Orange (AO) is a tricyclic heteroaromatic dye that can label DNA and RNA, and is a heterochromatic fluorescent dye. The dye has membrane permeability and can penetrate the cell membrane to stain nuclear DNA and RNA. Therefore, AO is often used to detect DNA and RNA in cells.

Catalog No.	520001
Size	10mL
Product Category	Cell Detection
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
