

E.coli Host Cell DNA Assay Kit

E.coli Host Cell DNA assay Kit is optimized for the quantitative determination of E.coli cellular residual DNA in biological products (e.g.recombinant protein, antibodies, vaccines, etc) with qPCR detection principle on TaqMan fluorescent probes. The kit has the characteristics of high-speed and high specificity.

Catalog No.	200011
Size	100 rxns
Product Category	Bioprocess Assay
Application	Quantitative detection of E.coli cell residual DNA
Kit Components	1. qPCR Master mix: 1.5mL; 2. Primer Probe mix: 0.5mL; 3. DNA dilution buffer: 3 x 1.5mL; 4. E.coli DNA positive control (30ng/uL): 50uL
Shipping	Gel Packs
Storage/Stability	-20°C / 1 year
