

CHO Host Cell DNA Assay Kit

CHO Host Cell DNA assay Kit is optimized for the quantitative determination of CHO cellular residual DNA in biological products (e.g. recombinant protein, antibodies, vaccines, etc) with TaqMan fluorescent probes qPCR detection principle on. The kit has the characteristics of high-speed and high specificity.

|-------------------|---|
| Catalog No. | 200012 |
| Size | 100 rxns |
| Product Category | Bioprocess Assay |
| Application | Quantitative detection of CHO cell residual DNA |
| Kit Components | 1. qPCR Master mix: 1.5mL; 2. Primer Probe mix: 0.5mL; 3. DNA dilution buffer: 3 x 1.5mL; 4. CHO DNA positive control (30ng/uL): 50uL |
| Shipping | Gel Packs |
| Storage/Stability | -20°C / 1 year |
