

DNAfect-I

DNAfect-I transfects DNA into HeLa, CHO-K1, COS, LNCaP, NIH3T3, U937, SF-9, S2 (Schneider - Drosophila), 293, T-24, C2C12, PANC-1, primary human keratinocytes, primary aortic smooth muscle, primary rabbit myoblasts, human bone marrow endothelial cells (HBMEC), and other cell lines. No significant toxicity was observed at working concentrations on the cell lines tested. 1mL of DNAfect-I is sufficient for 250 transfections in 35-mm plates.

Catalog No.	590021
Size	1ml
Product Category	Transfection Reagent
Storage/Stability	2 ~ 8°C/2 years
Shipping	Gel Packs
