Mitochondrial Extraction Kit

REAL-Prep™ Mitochondrial extraction kit is used to isolate complete and purified mitochondria from animal cells or tissues. It is suitable for the preparation of animal soft tissue (liver or brain tissue), hard tissue (muscle) and mitochondria of cultured cells. The preparation has high yield and can be used for research on apoptosis, signal transmission, metabolism and proteomics.

Kit Components:

1. Lysis Buffer: 50mL
2. Mito-Wash Buffer: 25mL
3. Storage Buffer: 5mL

Catalog No.	521011
Size	50 preps
Product Category	Cell Isolation
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
