REAL-Prep™ Plant Protein Extraction Kit

REAL-Prep™ Plant Protein extraction kit is designed to extract protein from plant tissues. The lysate in the kit contains protease inhibitors, which has a mild effect and can quickly obtain total protein. It can be used for basic research experiments such as western blotting experiments. It cannot be used in the study of protein kinases.

Catalog No.	501019
Size	50 preps
Product Category	Protein Isolation
Storage/Stability	2 ~ 8°C & -20°C/1 year
Shipping	Gel Packs
