Antigen Retrieval Solution - Tris-EDTA [50x, pH 9.0]

Tris-EDTA Antigen Retrieval Buffer (pH 9.0) intended for heat-induced target retrieval prior to immunohistochemical staining procedures. It is well-suited for use on formalin-fixed, paraffin-embedded tissue sections mounted on glass slides. Compared with citrate buffer, the use of Tris-EDTA Antigen Retrieval Buffer, pH 9, significantly improves staining results for many antigen. Tris-EDTA Antigen Retrieval Buffer, pH 9, is as effective as pH 9.9 solutions for the majority of antigens, and it preserves the morphology better.

Catalog No.	506013
Size	100mL / 500mL
Product Category	Immuno Reagent
Storage/Stability	Ambient/1 year
Shipping	Ambient
